General Surgery

Health is Our Mission

Estes Park Health provides healthcare services from the start of life to the end of life, and everything between. It's our privilege to provide excellent compassionate health care to the Estes Valley. Our mission states that "We exist to make a positive difference in the health and well-being of all we serve."

Moving to include "Health" in our name reflects our mission to help our community remain healthy and active. Our goal is to provide access to health care with services our community needs to stay close to home, close to family and close to their primary care physician.

General Surgeons provide skill, knowledge, and compassion

Surgical services are now available at Estes Park Health 24/7/365 to take care of a patient's scheduled or emergent surgery needs. Our general surgeons are committed to providing excellent patient care and are champions of enhancing the overall surgical experience.

Our skilled surgeons believe that the single most important thing they can do for a patient is to make the possibility of having surgery less frightening. Our surgeons know that each patient has their own unique personality, history, level of anxiety, and expectations, so they will answer every question to ensure understanding of the procedure being performed.

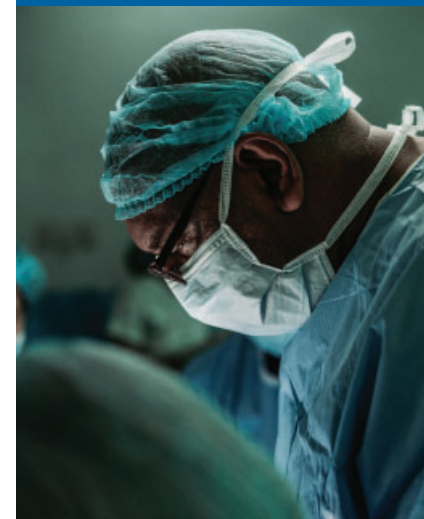

***For an urgent or emergent consult, please call a surgeon directly:
970-744-0974***

"No procedure or surgery is routine, no matter how many times our highly skilled surgeons have performed it."
