HEALTH

Infusion

Estes Park Health provides a valuable service for patients needing chemotherapy, antibiotic or other types of infusion through our Outpatient Infusion Clinic, which partners with UHealth for cancer care. Our patients can be cared for locally instead of making a long drive after therapy. Penicillin testing is also performed at the Infusion Clinic. We find that many people previously diagnosed with a penicillin allergy do not have one.

Call the Outpatient Care Coordinator at 970-744-1768 for more information.
